Name

Mohammed Aaqib R

Roll Number

22BI24EE417-T

EXPERIMENT

Title

PYRAMID SUM

Description

Adam has a pyramid of numbers. The pyramid structure is formed by arranging the numbers in the following pattern

```
        1
       212
      32123
     4321234
    543212345
N___212___N
```

The first row contains the number 1. The second row contains the numbers 2, 1, and 2. The third row contains the numbers 3, 2, 1, 2, and 3. This pattern continues for subsequent rows, until it reaches N, which represents the height of the pyramid.

Given height of pyramid N find the sum of the numbers in the pyramid and return the sum as the output.

Sample Input:

3

Sample Output:

17

Explanation:

```
        1
       212
      32123
```

sum=1+2+1+2+3+2+1+2+3=17

Source Code:

```
n=int(input())
res=0
for i in range(1,n+1):
    temp=(i*(i+1))-1
    res+=temp
print(res)
```

RESULT

5 / 5 Test Cases Passed | 100 %

```
n=int(input())
res=0
for i in range(1,n+1):
    temp=(i*(i+1))-1
    res+=temp
print(res)
```
